

# 2020 Call for Papers

Annual Meeting, Population Association of America

Washington, DC, • April 22 - 25, 2019

Deadline for Submissions: September 29, 2019

## Before Submitting a Paper or Poster, Please Note the Following:

- After your submission has been selected for a session, you will be required to pre-register for the meeting to confirm your intention to attend.
- **Agreeing to participate in an oral or poster session and then cancelling shortly before the meeting (or simply not showing up) takes from someone else the opportunity to present their work. PAA has begun tracking no-shows and authors could face future penalties.**
- PAA cannot accommodate schedule requests. When making travel arrangements, plan to attend the entire conference.
- PAA's two-presenter rule (detailed below) allows an individual to present only twice (but four total program appearances are allowed). For scheduling purposes, only the two presentations are taken into account. Because of the sheer volume of co-authors, we cannot consider the schedule of a non-presenting author when setting the conference schedule. If you make changes to the presenting author after the schedule has been set, please keep this in mind.
- **Organizers will not review papers from close collaborators or current students and postdocs. If your submission creates a conflict of interest, your paper will not be considered for that session.**
- PAA's travel grants provide only partial funding and are very limited in number, so please do not rely on acceptance as a sole source for funding to attend the PAA Annual Meeting.

## Instructions for Submitting a Paper

1. Presenters, discussants, chairs and session organizers must register for the conference. **All presenting authors must pre-register for the conference by January 27 to confirm their intention to attend and present.** Members receive a preferred rate for annual meeting registration, and all participants are strongly encouraged to join. [Learn more about PAA membership online.](#)
2. **Online submissions will be made through MiraSmart this year and will open on August 12, 2019.** Authors are asked to submit both: a) a short abstract (150 words); and b) either an extended abstract (2-4 pages, including tables) or a completed paper. You may modify your submissions at any time until September 29, 2019.
3. Extended abstracts must be sufficiently detailed to allow the session organizer to judge the merits of the paper. Typically, extended abstracts consist of statement of research question (and the underlying theory, if appropriate), the data and research methods, and the expected findings. If your submission is accepted for a regular session, you must upload the full paper by April 12, 2020.
4. The PAA 2020 submission website will allow session organizers to view the titles and authors of submitted abstracts as they are submitted. The author making the submission must provide the full name, affiliation, country and email address of each coauthor. **Please verify that the email address you use for each author is the same one on file with PAA to avoid duplicate records and to make sure all the authors' submissions appear under the same record.**
5. At the time of submission, if there are multiple coauthors one must be identified as the author who will present the paper. (See below for specification of PAA's two-presenter rule.) This can be revised until the program is finalized; you will be informed of the deadline via email.
6. As in the past, all sessions are numbered. If you wish to have your abstract considered by two organizers, you must indicate the session numbers of your first and second choices. Two sessions is the limit. The first designated organizer is given first right of acceptance. No paper/abstract may be

submitted to more than two sessions

7. The number flash sessions has increased this year. These sessions will consist of two parts: first, “flash” presentations (4-6 minutes in length) of each paper; second, display of posters with an informal give and take at each poster.
8. Submissions to either regular sessions or flash sessions can be designated as candidates for a poster session. This option will be offered during the online submission process.
9. In addition to the 154 sessions listed in this Call for Papers, approximately 80 "overflow" sessions will be created at the request of session organizers who receive large numbers of submissions. In choosing where to submit your paper, keep in mind that session organizers with broad session titles may end up organizing two or three sessions. The upshot is that you are advised to submit to the session that best matches the topic of your research.

## Instructions for Submitting a Poster

1. Members are encouraged to submit abstracts/papers for consideration as posters. All the above instructions also apply to poster submissions. Authors who wish to have a submission considered *only* for a poster session should submit to Session 1202.
2. An author who is submitting a paper to one or two regular sessions, or a regular session and a flash session, may ask that the submission be considered for a poster session if it is not accepted in the regular or flash session. This is accomplished by checking "yes" in the appropriate box of the online submission form. Unless you check “yes,” your paper will not be considered for a poster.

## Two-Presenter Rule

The PAA Board of Directors has instituted a two-presentations rule, i.e., each person is limited to a maximum of two presentations (summed across regular oral sessions, flash sessions and poster sessions). A further rule is a limit of four appearances in total, encompassing the roles of presenter, chair, and discussant. But there is no limit on how many times a person can appear on the program as a co-author. Single-authored papers must be presented by the author. For multiple-author papers, at the time of submission a presenter must be designated; once all sessions are finalized (that is, all papers and posters have been accepted or rejected), there will be a short time interval when presenter status can be revised. Note that for the purpose of the two-presentation rule, the roles of chair and discussant do not count; instead, there is a limit of four presentations in the roles of presenter, chair, and discussant inclusive.
